

Integration Developer — Oracle EBS

Location: Montevideo, Uruguay

ROLE OVERVIEW

Design, build, and support enterprise integrations across **Oracle E-Business Suite (R12)** and connected platforms. Translate business requirements into scalable middleware solutions while ensuring reliable, high-performing integrations that support global operations.

KEY RESPONSIBILITIES

- Design, develop, and deliver integration solutions aligned to business and technical specifications.
- Translate business requirements into middleware integration solutions using **Oracle Integration Cloud** platform.
- Support integrations across **Oracle EBS (R12.2.6)**, **eCommerce**, **Supply Chain**, **PIM**, **PLM**, and digital applications.
- Troubleshoot and resolve production issues and mission-critical defects.
- Perform unit, system, and regression testing in collaboration with technical leads.
- Support code migration and deployment to production environments.
- Escalate technical risks and ensure timely resolution.
- Drive continuous improvement and operational stability of integration platforms.

QUALIFICATIONS & EXPERIENCE

- BS in Computer Science or related field (or equivalent experience).
- **5–7 years** of integration development experience.
- Experience delivering enterprise middleware solutions.
- Strong exposure to Oracle EBS integrations.
- **Bilingual proficiency with English** is important.
- Solid understanding of **LATAM market federal regulations** is required.
- Knowledge of **Brazil (BR) tax regulations** would be an advantage.

TECHNICAL EXPERTISE

- **Oracle Integration Cloud (OIC)**
- **SOA / WebLogic (BPEL, OSB)**
- **Advanced PL/SQL** (tables, views, DML)
- **Java, JSON, Python**

- **Unix Shell** scripting
- **JDeveloper**
- **GitHub** (source control)
- SDLC best practices

ORACLE EBS FUNCTIONAL KNOWLEDGE

- Strong understanding of **Oracle R12 data model** and base tables.
- **Supply Chain**: INV, WIP, BOM, CST.
- **Order-to-Cash**: OM, Advanced Pricing.
- **Procure-to-Pay**: AP, Purchasing.

NICE TO HAVE

- ETL experience using **Matillion**.
- Data integration with **Snowflake**.
- Exposure to modern data platforms and pipelines.

CORE COMPETENCIES

- Strong problem-solving and troubleshooting skills in production environments.
- Ability to manage multiple concurrent initiatives.
- Effective communication and collaboration with technical and business teams.
- Self-driven, accountable, and adaptable.
